GOOD AND BAD GOVERNMENTS.

The question often suggests itself to thinking Americans, Have we the best government? and many honest and patriotic men are often disposed to have a doubt on the subject when a comparison is made between the orderly and systematic style in which all the details of such a government as that of France, for instance, are conducted, and our own loose way of doing business, with the outrageous frauds that are daily exposed, the impossibility of checking them, the disgraceful scrambling for offices, the low character of our politicians, and the open infamy of much of our legislation. On the surface, one system is all order, regularity, intelligent exertion of power for the benefit of the subject and the nation at large; and the other seems a state of semi-anarchy, in which no one has any responsibility, and the only rule seems to be "every one for himself and the devil take the hindmost."

In the United States citizens, under all the ordinary vicissitudes of life, are expected to take care of themselves, and they generally do it better and with more satisfaction than if they were under a constant police espionage. There are few men who would not rather take the risk of tumbling down a deep hole occasionally than to have the eyes of a policeman constantly watching every movement. And this is just where the republican Government of the United States asserts its superiority: the citizen can do what he pleases, can go where he pleases, and can say what he pleases without let or hindrance from anybody, so long as he does not trespass on other men's rights.

Our political rings, and wire-pulling, office-hunting, revenue frauds, and other unpleasant features are certainly not to our credit; but in the United States such matters are openly discussed, the rascals are denounced, and the public have the power to create a reform if they choose to take the trouble to do so. Under a despotic government there is probably more swindling and rascality among attaches of the Government than there is here, but such matters are hushed up, the press dares not speak of them, and because nobody ever hears them mentioned many are silly enough to believe that corruption does not exist. Every now and then some grand piece of rascality in connection with the Government is brought to light, and the world has a glimpse of the corruption that is so carefully hidden from their gaze on ordinary occasions. Heavily taxed as we are, and swindled as we are by dishonest men in offices of trust and honor, the American people have yet cause to congratulate themselves that theirs is yet the cheapest and best government on the face of the earth. When we become disgusted with the corruption and dishonesty that pervade our public service, it is just as well sometimes to look on the other side of the picture, and to estimate the blessings that we really enjoy. There are few American citizens who would not prefer to enjoy their present liberty of speech and action, at the expense of some knavery at Washington or Harrisburg, rather than to exchange our loose-jointed system for a more perfect organization like that of France, which could never exist except under a despotism. The people of this country can put down the wire-pullers, the rings, and the professional politicians, if they choose to make the effort; and it is because they will not make the effort that rascality in politics has become so rampant. This is a duty, however, that ought not to be evaded, and those who enjoy the blessings of a free government ought also to use their influence to make it respectable. It is disgraceful that a few corrupt men should be permitted to manage our public offices solely for the benefit of their own pockets; and the issue is now being fairly presented in this city and State as to whether the people or the rag-tag and bob-tail of the various political organizations shall rule.

THE MISFORTUNES OF BRAZIL.

EMERSON PENRO just now must be, like "Othello," "perplexed in the extreme." The Paraguayan dictator, at bay in some undiscovered fastness, is exhausting at once by persistence the power and patience of his army and his ally and the imperial treasury. An English steamer, in attempting to leave Rio with a foreign resident aboard who had not published, according to the requirement of a law for the protection of creditors, his intention of departure, has been fired into by Fort Santa Cruz, and compelled to return to her anchorage ground. And Minister Webb, having several times before threatened to leave, has finally turned his back on the delightful villas and semi-tropical luxuriance of Gloria and sailed for home, as fully charged with diplomatic cholera as any battery of Leyden jars is with electricity.

And the war in Paraguay, which was to have been finished with the capture of the fortresses, and was said certainly to be finished with the occupation of Asuncion, still drags its slow length along. The victorious allies lingered at the deserted capital to play at a make-believe government which fed about a thousand miserable inhabitants of both sexes, maimed, sick, and superannuated, for their fealty. Then the old Brazilian Field Marshal, in a fit of spleen, turned over the command of the forces to a subordinate, an i. without any leave of absence having been accorded him, returned to Rio. The successor of Caxias has in turn been succeeded by an imperial priest, who is now at the front as commander-in-chief, and directing the march towards the interior, which has begun rather disastrously with the destruction of a Brazilian cavalry regiment.

Whatever of selfishness may have entered into the motives that led to this crusade against Lopez, and whatever of retribution within the allowed limits of modern warfare may be meted out to him by the allies if they succeed, his humiliation, if not his destruction, will be in the interests of humanity and civilized progress. Doubtless the atrocious rigor with which he has governed a singularly docile and courageous people—an Indian race early trained to habits of unquestioning obedience by the Jesuits—has been exaggerated by enemies who barely escaped the fate of victims; but the testimony to the terrorism of his utterly irresponsible government, and to acts of malignant personal savagery, from intelligent and reputable foreigners, and even on the admission of his own officers, is cumulative and irrefutable. He belongs to an inhuman crew of little Hispano-Indian despots, as represented preeminently by his own father, Rosas, and Francia, who have long been the curse of that vast and exuberant region watered by the Plata and its tributaries. Relying upon subjects whom he robbed, tortured, and executed at pleasure, but who were trained into an anomalous and fanatical devotion which could exist only among savages with a rudimentary culture, he treacherously armed himself, in the security of insincere compacts, for purposes of aggression and aggrandizement. He sought north, west, and south for fresh territory, that he might subject it to his desolating rule and afflict it with his narrow policy. His Paraguayans have fought with an imposing intrepidity and suffered with a stoical endurance. But they have been compelled to surrender to and recede before superiority in numbers and the appliances of military science. Much more than half of the fighting population of the country is supposed to have perished in the field, in the trenches, by disease and famine. And perhaps at this time there remain to the Dictator not over three hundred thousand subjects, spared by the devastation of a wantonly provoked war, in the entire State.

After all, in the contemplation of the human misery and vast desolation of Paraguay, the ruler of Brazil will probably not be disposed to hawk his sorrows in too loud a key. Though he may be threatened again with arrogant demands delivered from behind British guns pointed at his palace, and though he may feel eclipsed by a cloud of diplomatic disfavor, he still has the consolation of a beautiful capital, a quiet people, and a prosperous empire.

OBITUARY.

Charles D. Meigs, M. D. The venerable Charles D. Meigs, M. D., one of the most distinguished medical men of the day, died suddenly yesterday at his residence in Delaware county. Dr. Meigs was a native of the State of Georgia, but he was a resident of Philadelphia during the greater portion of his long and useful life, and both in his professional capacity and as a private citizen he was well known and respected by the entire community. He entered the medical department of the University of Pennsylvania in 1812, and after completing his course of studies, he returned to his home in the South, where he remained for several years. In the year 1820 he took up his residence permanently in Philadelphia, and in a short time gained an extensive and very valuable practice. He made a specialty of the diseases of women and children, and in the important and difficult branch of obstetrics he obtained a well-deserved reputation, and was considered the highest living authority on the subject in the United States. About the year 1840 he accepted a professorship in Jefferson Medical College, and for twenty years he labored with much success as an instructor in that institution, contributing much to its efficiency and high standing as a school of medicine.

About six years ago Dr. Meigs, although in full possession of all his faculties, began to feel the weight of years, and he determined to retire from professional life; and in order to escape the demands that were constantly made upon him, he took up his residence on his farm in Delaware county, where he amused himself with literary work, which gave him all the occupation that he desired in his declining years. Dr. Meigs was connected with the obstetrical department of the Pennsylvania Hospital for about ten years, and he was well known, both in the Old and New World, as a clear and forcible writer on medical subjects. His earliest writings appeared in the North American Medical and Surgical Journal, which he edited in connection with Drs. Hodge, Bache, Coates, and La Roche. He also translated Veitpaur's "Elementary Treatise on Midwifery," and also the complete treatise of the same author. In 1838 he published "The Philadelphia Practice of Midwifery" in 1847. "Lectures on some of the Distinctive Characteristics of the Female;" in 1849, "Remarks on Spasmodic Cholera;" in 1849, "Obstetrics: the Science and Art;" and in 1850, "Observations on Certain Diseases of Children." These works by Dr. Meigs are considered

standard authorities in the medical profession. As a writer he was clear, forcible, and elegant, and in addition to his knowledge of medical science he was a gentleman of fine culture and literary tastes. In addition to the works enumerated above, he published a number of lectures on medical and other subjects, and but a short time ago he issued a translation of a singularly interesting French novel entitled "Typhaines Abbey."

YORK TRIES A SPHERICAL. In York's fair streets, where Rebel bugles blow, When Lee marched North to find the Waterloo, Peace scatters blessings now with bounteous hand, And grateful plenty fills the smiling land. A trial, not of arms, together drew Her people lately, to a novel view: To test with power in every way they could The huge BLACK BALL that on the pavement stood. They first skilled men, with hardened drills, obtain, To penetrate its iron skull in vain; The tempered steel snaps on its flinty form, And feebly falls the sturdy shell to harm; Now brassy arms aloft the sledges wield, Dealing stout blows, to force the sides to yield; The powerful sledge runs at last to spring; The solid sledge, cracked like a worthless thing, No more assails the impenetrable ball, And MARVIN'S BUGULAR SAFE defies them all.
